Pangururan, Samosir, North Sumatra, Indonesia

PROFESSIONAL SUMMARY

Motivated and detail-oriented Information Technology student at Institut Teknologi Del (IT Del), passionate about building impactful digital solutions. Experienced in full-stack web and mobile development using Laravel, Flutter, and React.js. Proven ability to collaborate effectively in team environments and contribute to organizational initiatives. Eager to apply technical skills and academic knowledge in real-world software development challenges.

EDUCATION LEVEL

2024 – 2027

Institut Teknologi Del
Laguboti, Toba

Bachelor of Information Technology

Studying at IT Del with focus on software engineering, mobile development, and web technologies. Currently working on real-world projects including a cafe ordering app and a linear algebra learning application.

2021 – 2024

SMAN 1 Pangururan
Samosir

Senior High School — Science

Completed science-track studies with strong foundation in mathematics and natural sciences.

ORGANISATIONAL EXPERIENCE

2026

Student Organization IT
Del

Member — Department of Religion and Social Affairs

Contributed to social and religious programs, fostering community values and supporting campus welfare activities within the student organization.

2025

IT Association IT Del

Cadre Committee — Information Technology Association

Supported event operations by coordinating transitions, mentoring participants, and ensuring the program agenda ran smoothly and on schedule.

PROJECTS

2024

Web Project

Cafe Del Website

Designed and developed a full-featured cafe website for IT Del's campus cafe, covering menu display, ordering interface, and content management using PHP and web technologies.

2026

Mobile Project

Kopitiam 33 — Cafe Ordering Mobile Application

Developed a Flutter-based mobile ordering app for Kopitiam 33 Balige, with multi-role dashboards (customer, cashier, owner), real-time order management, revenue analytics, and a Laravel REST API backend.

2026

Mobile Project

ALIN — Linear Algebra Learning App

Built an interactive mobile application to help students learn linear algebra through structured modules, exercises, and step-by-step visual explanations.
