PROFESSIONAL SUMMARY

Motivated Information Technology student at Institut Teknologi Del (IT Del) with hands-on experience building and deploying full-stack web and mobile applications using Laravel, Flutter, and React.js. Proven track record delivering production-ready systems end-to-end — from database design and REST API development to AWS cloud deployment — across multiple academic and hackathon projects. Strong problem-solver with a preference for clean architecture, complete implementations, and reliable, well-tested code. Actively involved in campus organisations and eager to contribute technical skills to real-world software challenges.

EDUCATION

Diploma in Information Technology — Institut Teknologi Del (IT Del)

2024 – 2027 (Expected)

Laguboti, Toba, North Sumatra

- Focus on software engineering, mobile development, and web technologies.
- Currently developing real-world projects including an AI-powered travel planner, a café ordering platform, and a linear algebra learning app.

Senior High School — Science Track

2021 – 2024

SMAN 1 Pangururan, Samosir

- Completed science-track studies with a strong foundation in mathematics and natural sciences.

ORGANISATIONAL EXPERIENCE

Member — Department of Religion and Social Affairs

2026

Student Organization, IT Del

- Contributed to social and religious programs, fostering community values and supporting campus welfare activities.

Cadre Committee — Information Technology Association

2025

IT Association, IT Del

- Coordinated event transitions, mentored participants, and ensured program agendas ran smoothly and on schedule.

PROJECTS

TobaWise AI — Smart Travel Planner for Lake Toba

2026

AI Hackathon ITDel 2026 · Laravel 13 · React · Tailwind CSS · Google Gemini API

- Built a full-stack AI travel planner with a Laravel REST API backend and React + Tailwind frontend, integrating Google Gemini (gemini-2.5-flash) for personalized itinerary generation.
- Seeded 18+ Lake Toba destinations and implemented four API controllers with a dedicated Gemini service layer for structured JSON recommendations.

Kopitiam 33 — Café Ordering Platform

2026

Flutter · Laravel · MySQL · AWS (EC2, RDS, S3) · Node.js OTP microservice

- Developed a Flutter mobile app with customer, cashier, and owner dashboards, featuring real-time order tracking, countdown timers, and revenue analytics.
- Deployed full production infrastructure on AWS EC2 with RDS MySQL and S3 asset storage, plus a Node.js OTP microservice with Brevo SMTP for email verification.

Sortali Rental — Batak Ceremonial Headpiece Booking Platform

2026

Laravel · Custom Booking System

- Built a Laravel-based rental website for a family business, featuring a custom multi-item booking system and Batak-inspired visual identity.

ALIN — Linear Algebra Learning App

2026

Flutter · Laravel Sanctum

- Built an interactive mobile app helping students learn linear algebra through structured modules and step-by-step visual explanations, with token-based authentication.

Personal Portfolio Website

2025 – Present

React · Vite · Tailwind CSS v4 · Framer Motion

- Designed and built a personal portfolio site showcasing projects and skills, with smooth animations and a modern, responsive interface.

TECHNICAL SKILLS

Languages & Frameworks: Laravel (PHP), Flutter (Dart), React.js, JavaScript, HTML & CSS

Databases: MySQL, PostgreSQL, Firebase

Cloud & DevOps: AWS (EC2, RDS, S3, IAM), Git & GitHub

Tools & Styling: REST API, Tailwind CSS, Framer Motion, Postman

Other: Problem Solving, Team Collaboration, Mobile & Web Development
